ABOUT STANCOLD...

99% of our Customers said they would use us again and recommend us to others.
Our team of 30 includes project specific Estimators, CAD Engineers and Project Managers – some with over 25 years’ experience.
We regularly undertake projects of different sizes and complexity throughout the UK. Our case studies will give you a better idea of how varied our work is: www.stancold.co.uk/casestudies

Regardless of the type of project we are quoting for, you can be assured that you are working with a friendly, experienced team who thrive on delivering a right first time approach as well as offering value for money.

We look forward to hearing from you.

Our system is built to perform...

**Impact Resistance**
- No damage and zero deflection to multiple large soft body impact of 120 N/m

**Shear Loading of 8.84 KN**
- Suitable for fixing shelving, lighting, Control panels

**Energy Efficient**
- Exceptional Insulation Properties U-Values of 0.09 W/m2k

---

**IndustriAL PartitionS**
**Impact Resistance**

- No damage and zero deflection to multiple large soft body impact of 120 N/m

Suitable for fixing shelving, lighting, control panels.

---

**Excellence Acoustics**

- 150mm Mineral Fibre Panel
- +50mm Mineral Fibre Infill
- +12.5mm Plasterboard
